

GBCA GreenStar Insulant ODP Requirements

(for Legacy Rating Tools for projects registered prior to 31 December 2015)

Green Building Council of Australia (GBCA) GreenStar Rating Tool requirements provide for a GreenStar credit to be awarded for the use of thermal insulation products that avoid the use of ozone-depleting substances, in both manufacture and composition. These include:

GreenStar Rating Tool	ODP Requirement
Office Interiors v1.1	Emi-2: Insulation Ozone Depleting Potential
Office v3 Office Design v2 Office As Built v2 Retail Centre v1 Education v1, Industrial v1 Multi Unit Residential v1 Healthcare v1 Public buildings	Emi-4: Insulant ODP
NZ Green Star - Office Interiors NZ Green Star – Office NZ Green Star – Education NZ Green Star –Industrial	Emi-3: Insulant ODP

Armaflex® FRV, Armaflex® FRV Paircoil, Armaflex® Kühlpair® and Armaflex® Solar meet the criteria specified in the above table that allows a GreenStar credit to be awarded for the use of thermal insulation products that avoid the use of ozone-depleting substances, in both manufacture and composition.

The above-mentioned types of Armaflex® pipe insulation are manufactured in Australia, at Armacell's plant in Dandenong, Victoria. Armacell's Australia Pty Ltd's management system is certified to ISO9001:2008 and ISO14001:2004.
