

**The Armaflex Toolbox: Tools for insulation professionals from Armacell**

*High-quality tools for installing Armaflex; Everything in its place*

**Münster, 08 October 2015. – This is what insulators have been waiting for: Armacell now provides all the tools and aids needed to install Armaflex professionally in a lightweight, yet robust, aluminium case. With the high-quality tools for measuring, cutting and gluing elastomeric insulation materials insulators are well-equipped for all fields of application.**

**Complete, well organized, robust and light**

Professional workmanship requires professional tools. That is true for every trade. Especially for the installation of Armaflex insulation materials, Armacell now offers high-quality tools made by well-known manufacturers which can be used to achieve optimal solutions in all fields of application. At the heart of the Armaflex Toolbox are four different knives which complement each other perfectly to fulfil very diverse requirements. In addition to the sharpening stone for the knives, the case also contains a tool for re-sharpening the copper pipe ends, which insulators use for fabricating fitting covers for branch pipes and T-pieces. A further practical implement is the bow compass, which was adapted for use with silver-ink marker pens to draw on Armaflex insulation materials.

**Everything in its place!**

On the building site work processes have to run quickly, smoothly and safely. With this in mind, the Armacell application specialists in cooperation with insulators have developed a toolbox which contains all the tools needed, even for applications where many different pieces have to be cut out of sheet material. As a partner of the trade, Armacell also supports insulation contractors in installing its products. In addition to an extensive range of accessories and aids such as application manuals and installation videos, the insulation manufacturer also holds numerous courses and workshops throughout Europe. Because high-quality products are the pre-requisite for long-

lasting insulation systems, but the system is only perfect when it is installed professionally.

**Tip:** The Armaflex Toolbox is presented in a video on YouTube. And Armacell is marking the launch with a competition to win one of five toolboxes at [www.armacell.de/competition](http://www.armacell.de/competition).

#### **About Armacell**

Armacell is a world leader in flexible insulation foams for the equipment insulation market and also a leading provider of engineered foams. In the year 2014, the company with currently 2,600 employees generated net sales of EUR 452.2 million. With its 23 manufacturing plants in 15 countries on four continents, Armacell follows a strategy of internationalization. The company operates within two main businesses: the Advanced Insulation business develops flexible insulation foam products for the insulation of mechanical equipment. The Engineered Foams business develops and markets light foams for use in a broad range of end-markets.

In addition to ARMAFLEX, the world's leading brand for flexible technical insulation, Armacell offers thermoplastic insulation materials, covering systems, fire protection and noise control solutions as well as special foams for a multitude of industrial applications. In recent years, Armacell has developed new insulation systems for the oil and gas market, core foams for composite materials, and low-smoke products that have set new standards in the industry.
