System Warranty

Product quality and system reliability are essential elements of the new Armaflex System Warranty Plan. This concept, which is unique in the market, allows you to benefit from comprehensive installation courses and an extended warranty for Armacell products.
Product quality, system reliability and strong partnerships - that’s what counts at Armacell

You can trust insulation materials made by Armacell. Because Armacell carries out system supervision, the only procedure which guarantees that insulation materials work perfectly. With our premium product AF/Armaflex you can be absolutely certain that you really are installing the high quality material you expect.

Successful, close cooperation between all those involved in the market is essential. From the certified insulation material wholesaler to the certified insulator, from the specifier to the project developer or installer: Armacell maintains close contacts to all those involved. As a result of more than 50 years of experience in the application of Armaflex throughout the world, Armacell is able to provide wide-ranging, wellfounded and highly-competent advice. This means that you can be absolutely sure to receive a long-lasting, high-quality insulation system.

„When we use AF/Armaflex in combination with the Armafix AF pipe support we now receive a project related warranty of 10 years. A great idea from Armacell.”

Hans de Klein
Technical Commercial Director
at Riweltie BV insulation contractores
1. Regular participation in our Armacell application trainings

2. Have 20% of your employees certified and become a certified Armaflex installation company

YOUR BENEFITS

// Improve your position when contracts are awarded. To give you an advantage over your competitors when it comes to tenders and bids, Armacell offers specialist companies¹ the exclusive opportunity to increase the statutory 2-year warranty period to an extensive manufacturer warranty of up to 10 years.

// Protect your clients against unexpected costs in the future. Customers always expect excellent quality and absolute reliability - you can now confidently offer both and thus continue to maintain strong customer relationships for years to come.

- Long-term reliability and protection against costs or repairs.
- Professional, fully documented installation.
- The certainty that the products installed are of the highest quality.

¹ The benefits are available for all insulators listed in the register of craftsmen and specialist firms which were full members of the ZDB e.V. or the Bundesfachabteilung Wärme-, Kälte-, Schall- und Brandschutz in the Association of the German Construction Industry at the time of the damage, provided that the installation was carried out during the term of the agreement.

² Compliance with the Armacell application guidelines is decisive for the warranty. In the event of non-compliance, in particular installation errors or incorrect sizing of the insulation, the resulting defects and/or damage are not covered by the warranty. After the statutory warranty period has expired, claims arising from the warranty extended to 5 (or 10) years include reimbursement of the verifiable costs for materials, wages and direct consequential damage. The warranty begins with the delivery of the materials by Armacell.
The Armaflex System Warranty is a partner scheme in which trained and certified insulation companies benefit from a warranty of up to ten years instead of the statutory two-year warranty period. The Armaflex system warranty not only gives the certified companies a direct competitive advantage, specifiers, trade partners and clients also benefit from this seal of quality. Quality and reliability are crucial in cold insulation. In many markets, insulation companies take part in Armacell’s training courses on a regular basis and have already been certified as trained Armaflex installation companies.

When awarding contracts, customers are looking for certainty – like all of us.

// Stand out from the competition.

// Build high levels of trust with your clients.

// Win more contracts and tenders, because you can offer customers long-term certainty.

// Take this opportunity to remind your clients what your company has to offer.
ABOUT ARMACELL

As the inventors of flexible foam for equipment insulation and a leading provider of engineered foams, Armacell develops innovative and safe thermal, acoustic and mechanical solutions that create sustainable value for its customers. Armacell’s products significantly contribute to global energy efficiency making a difference around the world every day. With 3,000 employees and 27 production plants in 17 countries, the company operates two main businesses, Advanced Insulation and Engineered Foams. Armacell focuses on insulation materials for technical equipment, high-performance foams for high-tech and lightweight applications and next generation aerogel blanket technology.
