

PROFESSIONAL TRAINING

Armaflex tube and sheet material

As an insulator with experience of installing Armaflex insulation materials you have already participated in an Armaflex Basic Training course. In this seminar you will deepen your practical knowledge of fabricating complex fitting covers using Armaflex tube and sheet material.

Main topics

- Short presentation on cold applications
- Participants work alone to insulate a complete pipe system including 90° bend, valve and various connections using tube and sheet material
- Application analyzed by our application specialist

Your benefit

When our applications specialist analyzes your work, he will point out possible sources of error and give you specific tips for improvements. In this way you will be able to avoid complaints due to incorrect insulation in future. Completion of the Professional Training is required if you wish to take part in Specialist Training courses.

Requirement

Completion of Basic Training
