Acoustic Technical Services

Armacell Acoustic Technical Services make recommendations, perform onsite audit assessments and provide practical solutions for your acoustic problems, from design through to operational stages of a project.

Working with our clients we are able to provide the best solutions based on budget, performance, operability and maintenance.

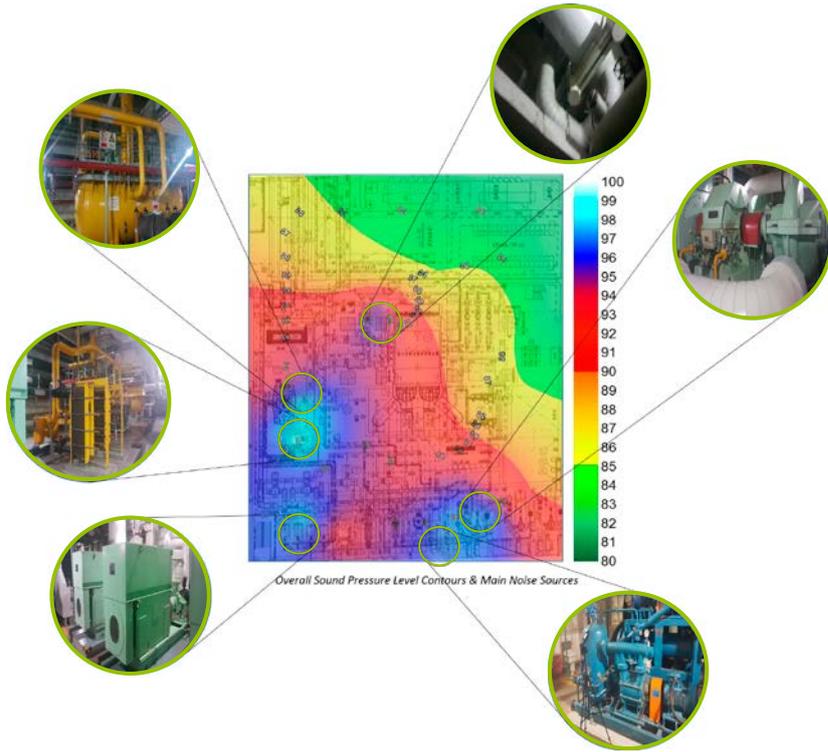

// ACOUSTIC PROJECT METHODOLOGY

- Armacell Acoustic Technical Services supports our clients throughout the acoustic project lifecycle to help deliver success.
- Our experts provide acoustic measurements, modelling, assessments and straightforward recommendations tailored to your requirements.
- Working with project teams, we provide impartial advice and noise control solutions that are effective and demonstrable.

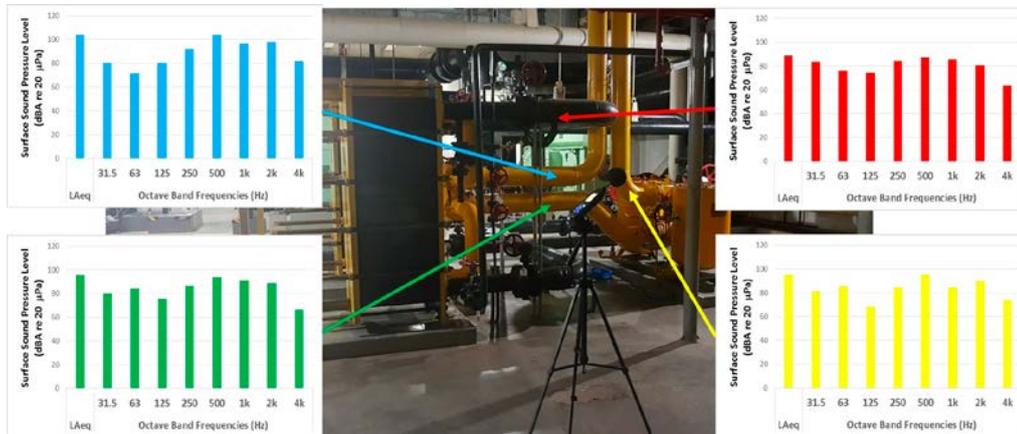

// DEFINE THE NOISE PROBLEM

Investigation and analysis of the sound environment reveals the nature of the problem.

Armacell Acoustic Technical Services can then identify where the problem occurs and how to further resolve the issue.

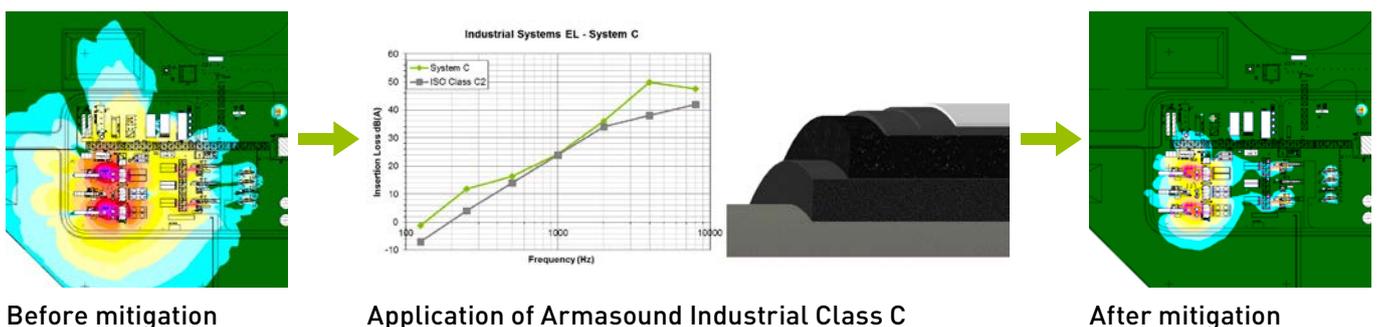

// UNDERSTAND AND IDENTIFY THE SOURCE OF THE PROBLEM

Detailed study of each of these high noise areas leads to identification of the specific causes of the noise problems.

This understanding allows Armacell Acoustic Technical Services to develop a range of appropriate solutions and their benefits.

// RECOMMEND THE CORRECT SOLUTIONS

Before mitigation

Application of Armasound Industrial Class C

After mitigation

The solutions we recommend, and the benefits they provide can be easily demonstrated.
