

## Press release

### Armacell awarded “Innovative Product of the Year” at INEX 2019

- Armacell’s latest product solution, ArmaGel HT, wins *Innovative Product of the Year* in the HVAC segment
- Next generation aerogel blanket, suitable for high-temperature applications up to 650 °C (1,200 °F)
- Available in 4 thicknesses, ArmaGel HT features proprietary dust-reducing technology developed by Armacell

Pune, 27 February 2019 – Armacell, a global leader in flexible foam for the equipment insulation market and a leading provider of engineered foams, has been honoured with the *Innovative Product of the Year* award for one of its latest product solutions, ArmaGel HT, by Realty Plus at the Interior & Exterior (INEX) awards ceremony in Mumbai, India.

Since 2009, Realty Plus acknowledges outstanding achievements in developing infrastructure facilities and promoting state-of-the-art designs and architecture in India’s realty sector. The INEX Awards honour those who have excelled in the building materials and construction industry. As part of Armacell’s new ArmaGel range, ArmaGel HT is a flexible aerogel blanket for high temperature applications up to 650 °C. With its low thermal conductivity, it is one of the best performing insulation materials available today, offering equal thermal performance at a fraction of the thickness - up to 80 percent thinner than competing insulation products.

*“We are honoured to receive this prestigious award for one of our latest product innovations at Armacell. It is our philosophy to focus on new technologies and develop products that deliver superior technical performance, and we are pleased that this resonates with the market,”* says Malte Witt, Armacell’s Chief Marketing Officer and Vice President APAC.

Armacell will be showcasing ArmaGel HT at ACREX India 2019, Hall 2, Stall C-2, between 28 February to 2 March 2019.
