DAS KAUÇUK VE PLASTİK LTD.ŞTİ

Establishment of Turkey’s first and only rubber insulation company Ltd. with 100% percent domestic capital

2010

2011

start of 3 shift sheet production

first export to Kazakhstan and Egypt

2012

start of pipe manufacturing

SODEX fair - 2011 Insulation Industry “The Best Investment” award

first participation in a foreign international trade fair - Project Lebanon

first export

vulcanization - new investments

2013

SODEX - sound insulation product of the year award

“KOBI and Entrepreneurship Awards 2014” - Innovative KOBI the Year Award

FONEC - sound and acoustic insulation product launch

first technical bulletin 2013/August

investment for the 2nd mixing line

2014

DAS YALITIM A.Ş. - title change

SODEX - sound insulation product of the year award

“The Best Investment” award

2015

New factory and address change of our Istanbul office

the world leader ARMACELL included DAS YALITIM Corporation as its 23rd production plant in its organization

a total of 100 staff will proceed with the title ARMACELL YALITIM
DAS YALITIM was founded in 2010 to work on the production of elastomeric rubber foam that is used as a heat insulator in the mechanical installations sector.

Following its foundation, DAS YALITIM services to the insulation sector, as an environmentally-friendly production company that rises with its performance day by day in the world and Turkey, works for the future, having completed its corporate structure and it is progressing with a quality-system and R&D studies.

DAS YALITIM is progressing extremely fast on its way to leading the sector with its vision, values, infrastructure, facilities, technology, quality, social projects, professional and experienced human resources, and the uniqueness it has.

As a result of our studies, the world renowned flexible insulation foam producer ARMACELL selected DAS YALITIM early in 2015 for its investments in Turkey. The renewed factory of DAS YALITIM is the 22nd factory of ARMACELL in the world.

ARMACELL seeks to develop further by increasing its quality in the Middle East, Northern Africa, the Balkans, and Turkic Republics as well as our own country.

As a consequence of being a member of ARMACELL family, our title DAS YALITIM SAN. VE TİC. A.Ş. was changed to ARMACELL YALITIM A.Ş. in June 2015.
ABOUT ARMACELL

Armacell is a world leader in flexible insulation foams for the equipment insulation market and also a leading provider of engineered foams. In the year 2014, the company with currently 2,600 employees generated net sales of EUR 452.2 million. With its 23 manufacturing plants in 16 countries on four continents, Armacell follows a strategy of internationalization. The company operates within two main businesses: the Advanced Insulation business develops flexible insulation foam products for the insulation of mechanical equipment. The Engineered Foams business develops and markets light foams for use in a broad range of end-markets.

In addition to ARMAFLEX, the world’s leading brand for flexible technical insulation, Armacell offers thermoplastic insulation materials, covering systems, fire protection and noise control solutions as well as special foams for a multitude of industrial applications. In recent years, Armacell has developed new insulation systems for the oil and gas market, core foams for composite materials, and low-smoke products that have set new standards in the industry.

Further information on Armacell can be found at www.armacell.com

REGIONAL HEADQUARTER

Münster, Germany

The Armacell group of companies in Europe is headquartered in Münster, Germany. This location primarily manufactures insulation products based on synthetic rubber. In addition to the production facilities, the central warehouse is also located in Münster. The warehouse is not only utilised by Armacell GmbH, but for dispatching goods and materials to other European location as well.
REFRIGERATION AND CHILLED WATER SERVICES

Refrigeration and cold water services operating at low temperatures leads to the formation of condensation which can cause problems with corrosion, mould growth and subsequently reduce the efficiency and service life of equipment if un-insulated or a product without an integral water vapour barrier is used. Closed cell Armaflex materials prevent moisture ingress with a high water vapour diffusion resistance value of up to 10,000 (μ value).

HEATING, VENTILATION AND AIR CONDITIONING

Insulation is an essential part of ducted heating, ventilation and air-conditioning systems, with the large surface areas causing significant heat losses/gains and problems with condensation, mould growth and poor indoor air quality.

Armaflex products are dust and fibre free and come with in-built Microban anti-microbial protection for additional safe guarding against mould and bacteria.

HEATING AND PLUMBING

The insulation of central heating pipework can reduce heat losses by as much as 87% and make a significant contribution to improving boiler efficiencies. The insulation of cold water pipes is also important to protect against pipes freezing in sub zero temperatures.

Armacell has also developed pre-insulated UV resistant and high temperature insulation ideal for solar hot water systems and for insulating ground source heat pump pipes to maximise efficiency.

MANUFACTURING INDUSTRIES

Process industry equipment including pipework, ducts, vessels, valves and flanges should be insulated to help ensure that steam, hot water, hot gasses or cold liquids and gases are delivered at controlled levels.

Elastomeric thermal and acoustic insulation systems are suitable for both high and low temperature process applications and easy to fabricate Armaflex sheet or tubes can be used to minimise heat loss/gain, improve process efficiencies, control condensation and provide mechanical impact and personnel protection.

OIL AND GAS

One of the greatest challenges for insulation of marine, offshore and heavy industrial environments is the issue of Corrosion Under Insulation which causes pipe and metal cladding systems to rust and decay, resulting in expensive production stoppages and maintenance schedules.

Closed cell insulation and non-metallic covering systems provide an excellent alternative for thermal and acoustic insulation to protect against mechanical impact, chemicals and salt water. Pre-fabricated fittings are also available to cut down on-site installation times in hazardous and process critical environments.
Elastomeric Rubber Foam

The elastomeric rubber foam materials having high vapor diffusion values, provide a good insulation and condensation control on the installation.

2013
Insulation Industry Achievement awards, “Insulation Installation of the Year Special Award”

2011
Insulation Industry Achievement awards, winner of “Investment of the Year Award”
NBR/PVC ELASTOMERIC RUBBER FOAM SHEETS / ROLLS

- Wide range of production.
- Production in 7 different thicknesses and 2 different widths;
- Manufactured in optimum sizes (1000-1200mm) for duct insulation.
- Lowers the scrap ratio in rectangular ducts.
- Lowers the total cost by decreasing the adhesive tape usage in round ducts.
- Helps to reduce the vibration in duct joints thanks to its flexibility.
- Using Oneflex Formix® contact adhesive is recommended for applying the Oneflex sheets/rolls to ducts surfaces.

NBR/PVC ELASTOMERIC RUBBER FOAM
SELF-ADHESIVE SHEETS / ROLLS

- Saves time and labour.
- Self-adhesive with netting.
- Ensures full sealing and eliminates the application faults.
- Decreases the scrap ratio by 2-3%.
- Manufactured in optimum sizes (1000-1200 mm) for duct insulation.
- Helps reducing vibration in duct joints by its flexibility.
- Provides high adhesion strength.
- Using Oneflex Formix® contact adhesive is recommended for applying Oneflex sheets/rolls to the ducts’ surfaces.

NBR/PVC ELASTOMERIC RUBBER FOAM SHEETS / ROLLS COVERED WITH ALUMINUM FOIL

• Aluminum lamination with polyester reinforcement.
• Best performance with high quality raw materials.
• Manufactured in optimum sizes (1000-1200mm) for duct insulation.
• Helps reducing vibration in duct joints by its flexibility.
• Packing resistant to external environment.
• Saves installation time compared to traditional cladding.
• High resistance to mechanical impact.
• Using Oneflex Formix® contact adhesive is recommended for applying Oneflex sheets/rolls to the ducts’ surfaces.

1. General
a. This General Terms of Sales ("Terms") resolves the offer, sales and delivery conditions between ARMACELL ("ARMACELL") and the Customer ("Customer") for the sale of Goods as specified in the Approved Order submitted to ARMACELL by the Customer.

2. Quotations, Orders and Confirmation
a. Unless otherwise accepted by ARMACELL, the prices indicated by ARMACELL in its quotations shall only be valid within 8 (eight) days from the date of notification of the quotation to the Customer. The quotations shall be subject to change and are subject to change without notice. Orders are not binding until confirmed in writing by ARMACELL. If the Customer’s acceptance of the quotation is not accompanied by an offer to sign a contract, ARMACELL has the right to reject an offer without stating the reasons therefor.
b. Each delivery shall be considered as a separate transaction and In case of a discount to the Customer separately by ARMACELL. In case of a discount to the Customer separately by ARMACELL. In case of a discount to the Customer separately by ARMACELL. The Customer shall be entitled to compensation losses that may arise due to this action if there are no claims, these claims do not affect the Customer’s responsibility. The warranty shall be transferred to the Customer with the delivery of the Goods. If there is a termination pursuant to Article 16, without prejudice to any other rights of ARMACELL, ARMACELL shall be entitled to request the immediate return of the Goods or re-process the Goods by an application for retaining an ownership. 9. Limited Commitment
a. ARMACELL commits that the Goods would conform to the specification only in the date of delivery. In case the Goods violate the commitment of ARMACELL, the Customer is entitled to refuse the delivery of all Goods, if the Customer’s acceptance of the Goods is not possible due to their own fault or the fault of others. ARMACELL shall be entitled to refuse the delivery of the Goods and to return the Goods to the Supplier.
b. ARMACELL shall not be liable for or against the Customer or any other person for the Goods or the use of these Goods unless ARMACELL is liable because of its negligence or fault. The Goods delivered to the Customer according to these Terms shall be only made by ARMACELL from the inventory and through the examination of records and samples taken from the production process of the Goods in accordance with the approved order. In case of a conflict between the parties about the lot of goods supplied to the Customer, unless a conflict of production quality, ARMACELL shall submit an example of the said product or process to a laboratory and the party shall bear the costs related to the laboratory.

b. After a Force Majeure situation, the exposed party shall be entitled to request the immediate return of the Goods if the Customer accepts the delivery and the right to refuse the delivery of the Goods or the use of these Goods to the Customer’s responsibility. Claims for damages which have been accepted or not been accepted shall be regulated to meet the legal requirements with the original provisions at the maximum extent permitted by law. 19. Intellectual Property Rights
Shipment or delivery shall not be interpreted as waiver of an earlier or later breach.

b. Payment and Acceptance of the Customer
a. In an Approved Order, unless otherwise stated, payment shall be made in accordance with the terms of the invoice. Any costs related to payment of the Goods by ARMACELL. Goods by the Value Added Tax or by a competent authority. ARMACELL shall not be liable for or against the Customer or any other person for the Goods or the use of these Goods unless ARMACELL is liable because of its negligence or fault. The Goods delivered to the Customer according to these Terms shall be only made by ARMACELL from the inventory and through the examination of records and samples taken from the production process of the Goods in accordance with the approved order. In case of a conflict between the parties about the lot of goods supplied to the Customer, unless a conflict of production quality, ARMACELL shall submit an example of the said product or process to a laboratory and the party shall bear the costs related to the laboratory.

b. ARMACELL reserves the right to require payment in advance by the Customer or any other person for the Goods or the use of these Goods unless ARMACELL is liable because of its negligence or fault. The Goods delivered to the Customer according to these Terms shall be only made by ARMACELL from the inventory and through the examination of records and samples taken from the production process of the Goods in accordance with the approved order. In case of a conflict between the parties about the lot of goods supplied to the Customer, unless a conflict of production quality, ARMACELL shall submit an example of the said product or process to a laboratory and the party shall bear the costs related to the laboratory.
